HEALTH CLIMATE CHANGE WORLD CONFERENCE RED CROSS

#HCCWCRC, CANNES | 16 APRIL, 2019

# *Global Consortium on Climate and Health Education (GCCHE)*

- The climate & health field is still young, with a modest number of experts, significant knowledge gaps, and few developed educational programs or curricula in health profession schools
- We must provide the next generation of global health leaders with the **knowledge and tools** to help protect human health and well-being from climate change and other planetary changes.
- The **Global Consortium on Climate and Health Education** was launched in 2017
  - **Vision**: That all health professionals throughout the world – doctors, nurses, and public health leaders and practitioners – will be trained to prevent, reduce, and respond to the health impacts of climate change.

For more information visit: [gcche.mailman.columbia.edu](http://gcche.mailman.columbia.edu)

# *Global Consortium on Climate and Health Education (GCCHE)*

- Obtains **commitments from health professions schools** worldwide to educate their students on the health impacts of climate change and other planetary changes that impact human health
- Brings together member institutions to **share best scientific and educational practices**
- Develops **global standards for knowledge and practice** on the health impacts of climate change that all graduates of health professions schools should possess, as well as shares resources that member institutions can use for this purpose
- Builds a **pipeline of health professionals** who focus on the health impacts of climate change
- Supports the development of **global academic partnerships** to foster mutual learning, particularly in under-resourced countries.
